INTRUCTIONS TO RUN

1. First you need to run the Login form. You cannot access any of the user information if you do not login(Customer object == null)
2. Example login: (email: t1@yorku.ca) (password:t1t1)
3. More logins can be obtained from the user.csv file
4. 3rd column is email and 2nd column is password.
5. ASSUMPTION: According to Slack it says that we do not need to implement OFFICER REQUESTS

EXAMPLE LOGINS(More can be found in user.csv file):

Email	Password	Type
t1@yorku.ca	t1t1	USER
admin@yorku.ca	admin123	ADMIN
robo@toof.com	of1	OFFICER
